YORK U

Passion to Profession

Become a changemaker for a just and sustainable future!

The Faculty of Environmental & Urban Change (EUC) at York University is preparing career ready graduates who are engaged global citizens, innovative leaders in positive change, and passionate professionals ready to meet the demand for green jobs.

If you are a solution driven problem solver, an environmental advocate, a social justice activist, or a person who loves our planet and the diverse people living on it, EUC is the place for you.

Why Study At The Faculty of Environmental & Urban Change?

Innovative and
Real-World Research

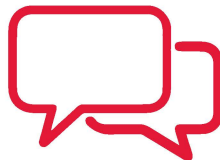

One-on-One
Career Coaching

Flexible and
Hands-On Learning

Diverse Global
Perspectives

Supportive and
Inclusive Community

Study Abroad Courses
at our EcoCampus

YES! WE HAVE CO-OP

Co-op is available in all EUC undergraduate programs, offering students a blend of academic learning and practical work experience with a wide range of local and global opportunities.

“This co-op complements my passion for urban sustainability and planning by exposing me to real-world stakeholder engagement and equipping me with practical skills and industry knowledge that will be valuable for a future career in policy, urban planning, or sustainable development.”

Shaniah Hutchinson
Sustainable Environmental Management Co-op Student at Hydro One

Cities, Regions, Planning (BES)

Explore how critical thinking concepts for smart, inclusive, & sustainable urban planning can address urban crises & create healthier, fairer, & more resilient communities worldwide. Tackle real-world challenges, like climate change, housing, & transportation, as cities grow & evolve.

Environmental Arts & Justice (BES)

Engage in creative artistic practice to address environmental & social justice challenges, integrating critical concepts, legal tools, policy, & community collaboration. Explore how Indigenous knowledge & sustainable philosophies inform contemporary leadership and change.

Environmental Science (BSc)

Study the science behind environmental systems & learn how to solve the world's most pressing challenges—like pollution, biodiversity loss, erosion, & extreme weather. Build hands-on scientific, technical, & analytical skills to create real, practical solutions for a sustainable & resilient future.

Global Geography (BA)

Take the lead in shaping the future of our planet by mastering advanced geographic information systems (GIS), cutting-edge research methods, & hands-on field techniques. Equip yourself with the tools to analyze and address complex challenges like migration, rapid urbanization, & environmental change.

Sustainable Environmental Management (BES)

Explore the exciting world of energy, water, waste, conservation, & natural resources while uncovering how these vital systems keep our planet thriving. Develop the skills & knowledge to create innovative, sustainable solutions that make a real impact on the future.

Program Pathways

Discover ways to enhance your career through direct-entry graduate studies & specialized degree options that compliment our undergraduate programs:

- > Specialized certificates in Geomatics or Climate Change & Sustainable Energy
- > Apply to the direct-entry BEd program or the Schulich School of Business's Masters in Management
- > Choose our 3+2 year program options with the Masters in Environmental Studies.
- > Double major or minor in other York U programs

Interested in studying with us but not sure which program to apply to? Consider our **Undeclared** option, which offers you an open first-year study experience exploring all of our majors.

Program	High School Requirements	Admission Average Range*	OUAC Code
